General Description

The LTC6084HMS8#PBF is a high-voltage, low-power op-amp that offers a combination of high voltage operation, low power consumption, and high precision. It is designed to provide precise amplification and signal conditioning in applications where high voltage capabilities and low power consumption are important.

Features

- High-voltage, low-power op-amp
- High voltage operation (up to $\pm 60V$)
- Low power consumption
- Low input bias current
- Low input offset voltage
- Rail-to-rail input and output capability
- Wide supply voltage range

Application

- Industrial control systems
- Automotive electronics
- Battery management systems
- Motor control systems
- Power supply monitoring and control
- Signal conditioning circuits
- Test and measurement equipment
