## General Description

XCF02SV0G20C is a part number for a specific type of Field-Programmable Gate Array (FPGA) manufactured by Xilinx Inc.

## Features

XCF02SV0G20C is a 2Mbit FPGA with 1.8V voltage supply.

It has a low standby current and supports in-system programmability.

It has a high endurance of up to 100,000 program/erase cycles and can operate in a wide temperature range.

## Application

XCF02SV0G20C is commonly used in industrial automation, telecommunications, and automotive applications for its reliable and efficient performance.

It can be used in any application that requires programmable logic, such as signal processing, digital signal processing, and control applications.
