## General Description

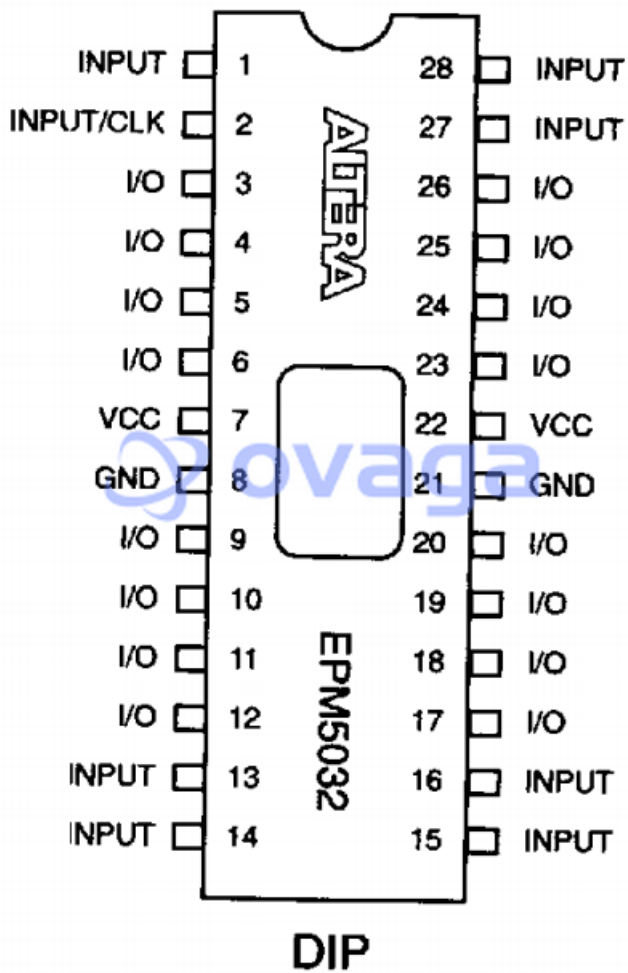

EPM5032DM883B is a type of Programmable Logic Device (PLD) manufactured by Intel (formerly Altera). It is a 32-macrocell Complex Programmable Logic Device (CPLD) with a maximum of 32 input/outputs (I/Os) and 32 product terms per output.

## Features

- Low power consumption
- High reliability and ruggedness (rated for military and aerospace applications)
- In-system programmability (ISP) through the Joint Test Action Group (JTAG) interface
- Fast propagation delay times (up to 7.5 ns)
- Flexible pin configuration for various I/O standards
- 5V or 3.3V operation

## Application

- Military and aerospace systems
- Industrial control and automation systems
- Medical equipment
- Communications equipment
- Automotive systems
