General Description

FGH60N60UFD is a power transistor module that is commonly used in high-power switching applications. Here are some of its features:

Features

It has a voltage rating of 600V.

It has a current rating of 75A.

It is designed for use in high-frequency switching applications.

It has a low on-state resistance of 0.08 ohms.

Application

Switch mode power supplies (SMPS)

Motor control systems

Inverters

Welding equipment
