General Description

M27C2001-10F6 is a type of UV erasable, electrically programmable read-only memory (EPROM) chip manufactured by STMicroelectronics. Here are some of its features:

Features

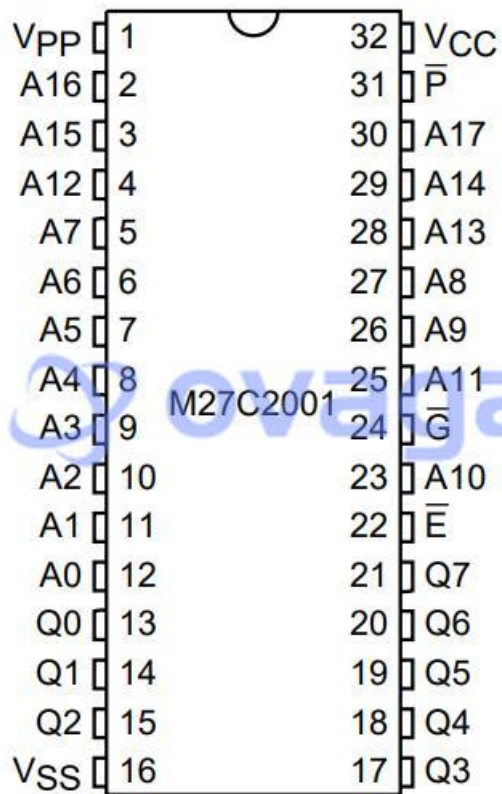

It has a capacity of 2 Megabits (256 kilobytes) organized as 262,144 words of 8 bits each.

It operates at a voltage of 5 volts and has a speed of 100 nanoseconds (10 MHz).

It is housed in a 32-pin plastic package with a window for erasure.

It can be erased by exposure to ultraviolet light and programmed electrically.
