

Dual Bias Resistor Transistors, Digital Transistors 100mA Complementary 50V NPN & PNP

Manufacturers	ON Semiconductor, LLC
Package/Case	SC-88-6
Product Type	Transistors
RoHS	Rohs
Lifecycle

General Description

This series of digital transistors is designed to replace a single device and its external resistor bias network. The Bias Resistor Transistor (BRT) contains a single transistor with a monolithic bias network consisting of two resistors; a series base resistor and a base-emitter resistor. The BRT eliminates these individual components by integrating them into a single device. The use of a BRT can reduce both system cost and board space.

Features

Simplifies Circuit Design

Reduces Board Space

Reduces Component Count

S Prefix for Automotive and Other Applications Requiring Unique Site and Control Change Requirements; AEC-Q101 Qualified and PPAP Capable

These Devices are PbFree, Halogen Free/BFR Free and are RoHS Compliant

Application

ONSEMI
