General Description

Microchip's SEC1110 is a low-cost, low-power, single-chip Smart Card controller with a USB 1.1 upstream interfaces. Using a combination of hardware and software, this device delivers high performance and flexible design customization options. The SEC1110 comes in a small-footprint 16-pin QFN and utilizes Microchip's TrustSpan™ technology which enables digital systems to securely communicate, process, move and store information on system boards, across networks and through the cloud. Up-to-date EMV and USB certifications enhance interoperability with all of the latest and legacy Smart Cards and host operating systems. Coming in a 16 pin package, the SEC1110 also supports host interface of USB, dual LED and general purpose IOs for high-value designs. Additionally, Microchip's complimentary and confidential USBCheck™ online design review service is available for customers who select the SEC1110 for their application design-in.*

*The USBCheck online design review service is subject to Microchip's Program Terms and Conditions and requires a myMicrochip account..

Features

Single USB to SmartCard Interface

ISO/IEC 7816

EMV-certified

Dedicated hardware for performance

8051 controller for flexibility

OTP memory for code and custom configuration data

Single-chip USB solution

Class A/B/C - no external level shifter

Integrated oscillator - no external crystal

Target Applications

Software Licensing Keys

PC-Link Reader

User Authentication

Thin/Zero-Client

Windows® Smart Card Login

Point-of-Sale (POS)

Counterfeit Device Detection

Network Access Security
