General Description

PC28F640P30B85 is a specific model of flash memory chip made by the company Micron Technology. Here are some of its features:

Features

- It has a capacity of 64 megabytes (MB).
- It uses a 3.0-volt power supply.
- It is designed for use in industrial and automotive applications, with a temperature range of -40°C to +85°C.
- It uses a parallel interface to communicate with other components.

Application

- Storage for firmware, operating systems, and other software in embedded systems.
- Storage for data in automotive applications, such as navigation systems, entertainment systems, and vehicle diagnostics.
- Storage for configuration data in networking and telecommunications equipment.
