General Description

MAX691EWE is a voltage monitor and reset circuit IC manufactured by Maxim Integrated. It is designed to monitor the power supply voltage of a system and reset the system when the voltage falls below a predetermined level.

Features

- Precision monitoring of power supply voltage
- Adjustable reset threshold voltage
- Manual reset input
- Active-low reset output
- Guaranteed reset assertion for at least 140ms
- Low power consumption
- Wide supply voltage range: 4.5V to 5.5V

Application

- Microprocessor-based systems
- Controllers
- Embedded systems
- Industrial control systems
- Automotive systems
