

Operational Amplifiers - Op Amps

Manufacturers	Analog Devices, Inc
Package/Case	PDIP-8
Product Type	Amplifier ICs
RoHS	
Lifecycle

General Description

The OP07AZ is a specific electronic component, which appears to be a high-precision operational amplifier manufactured by Analog Devices. It is designed for applications that require low input offset voltage, low input bias current, and high open-loop gain.

Features

- Low input offset voltage and offset voltage drift
- High open-loop gain
- Low noise
- Low input bias current
- Low input offset current
- Wide supply voltage range
- Internal frequency compensation

Application

- Precision amplification
- Instrumentation amplifiers
- Data acquisition systems
- Filters
- Oscillators
- Voltage regulators
- Transducer amplifiers
