General Description

XC9572-7TQG100C is a type of programmable logic device (PLD) manufactured by Xilinx.

Features

It has a capacity of 72 macrocells, which can be configured to perform various logic functions.

It has a maximum operating frequency of 7.5 MHz.

It has an input/output voltage of 3.3V.

It comes in a Quad Flat No-Lead (QFN) package with 100 pins.

Application

It can be used in various applications, including telecommunications, networking, and automotive industries.

It can be used for glue logic, system control, and digital signal processing.
