

0.1 uF, +5 V Powered CMOS RS-232 Drivers/Receivers

Manufacturers	Analog Devices, Inc
Package/Case	SSOP28
Product Type	Interface ICs
RoHS	
Lifecycle

General Description

ADM211AR is a component manufactured by Analog Devices, which is a RS-232 Transceiver IC. It is designed to provide interface between a microcontroller or microprocessor with RS-232 standard communication devices such as modems, printers, and sensors.

Features

- Supports data rate of up to 460 kbps
- Operates with a single +5 V power supply
- Provides ± 15 kV ESD protection on the RS-232 bus pins
- Has a shutdown mode for power savings
- Offers a variety of control options for flexible use
- Uses a low-power CMOS process for low power consumption

Application

- Industrial control systems
- Point-of-sale terminals
- Medical devices
- Instrumentation systems
- Networking equipment
- Data acquisition systems
